MANUAL

Thank you for purchasing Lietuva TOPO (LTZ) map.
 We hope it will help you while traveling in Lithuania. We will appreciate if you will find a time to report all found errors and bugs - please send them to info@garmin.lt. By doing this you will help yourself, and other users of this map too, as we intend to release new updates with these corrections. All registered users will have possibility to download these updates by Internet, FREE of charge. You will be informed about the new update available to your registered Email address. Enjoy your trips in Lithuania!

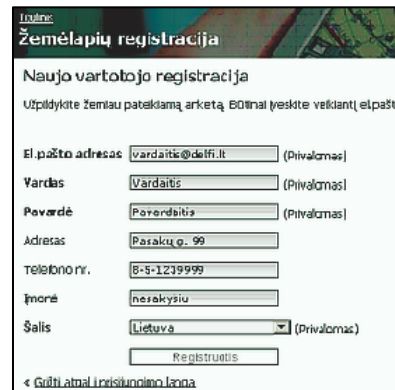

1 - Connect to Internet and go to site <http://www.garmin.lt/en>. On the left side click "UNLOCK YOUR MAPS – [CLICK HERE](#)"

3 – Enter your personal data into the corresponding fields. **Important** – Enter your **REAL and working E-mail address** – it will be used for the future connections, also for the lost password delivery. When all entered – click „Register”

2 – In the new window enter your 8 digit coupon code (find it sticked under CD, in the LTZ box). Click „Register coupon code“. On the next window click “Begin the registration”.

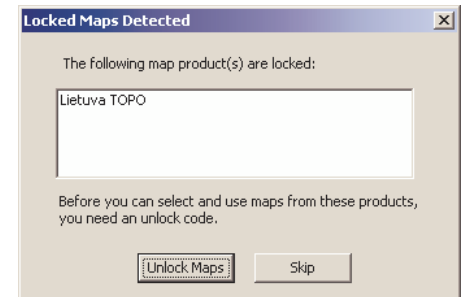

4 – Next step is VERY IMPORTANT. You must enter your internal ID of GPS navigator. **Make sure you enter a correct data, as it will be not possible to execute this registration under the same coupon code once again!**

The main data in this step is the internal **UNIT ID**. This ID you can find on the LCD display on your navigator, normally it contain 10 digits. Also you can read it from the unit by MapSource software, as described in steps 5 to 7. If ID is already known, skip steps 5-7, and go directly to step 8

5 – Leave your browser open, load the purchased LTZ CD into CD-ROM of your PC. An installation wizard will start. Make the proper actions according to instructions seen on PC screen.

6 – Connect your GPS navigator to PC (to COM or USB port), and turn it ON. Launch the MapSource application, which you have just installed in step „5“ (desktop icon **MapSource**). After Mapsource starts – skip one step by pressing button **SKIP**.

7 – In the top line of the MENU press **Utilities**, then **Get Unit ID**. New window pops up where you will see your unique internal GPS UNIT ID (10 digits). Write it down, it will be required to enter during internet Unlock process (step „8“). If ID is not seen – press „Find Device“ button. If you know how to use PC clipboard, use „COPY“ button – later it can be entered by command PASTE (Ctrl+V).

8 – Go back to your Internet browser window. Enter your **GPS Unit ID** (or use PASTE by Ctrl+V) into first field. Next field is for unit's serial number (usually 8 digits) – you can find it on the back side of the GPS, also printed on the packing carton. Sometimes it can be found under battery compartment lid. Select you GPS model in the 3rd field. When all fields are filled in – check it out carefully one more time, and hit **“Generate Unlock Code”**.

9 – In the next window opened you will see the **25 digit unlock code** – this will unlock your LTŽ for a full potentation. This code unlocks maps ONLY for your unique GPS navigator, recognised by the internal **Unit ID**. (picture on the right is just an example – in reality the code will be different). Write down this 25 digit Unlock Code, and put in safe place – you may need it in the future. To avoid mistakes – use copy into clipboard by (Ctrl+C).

10 – Go back to your MapSource application, and hit **Utilities** in the MENU, and after - **Unlock Maps...** Hit button „NEXT“ 3 (three) times in the new window, and you will see window like this:

Enter your 25 digit UNLOCK CODE into top field (or use Ctrl+V), and press **NEXT** (second field is for your custom comments, and is not mandatory)

11 – After all done properly, you finally will see the following window:

Congratulations! You have successfully unlocked your Lietuva TOPO for a full power use

Click on **CLOSE**, and you are done

ENJOY your trips in LITHUANIA !
